Chevrolet Trailblazer

DURAMAX DIESEL

Tough, powerful and fuel-efficient

Thrill to the latest Chevrolet's proprietary Duramax engines

2.5 Duramax Diesel

With 4 cylinders, 16 valves and 150 horsepower, the 2.5-liter Duramax diesel engine churns out 350 nm of torque at 2,000 rpm. More power is delivered with less fuel consumed, thanks to the direct injection system. Meanwhile, the turbocharger and the intercooler system work together to regulate the temperature and density of air being circulated in the engine at a time, for improved combustion, as well as, greater horsepower and torque. The forceful engine is mated to a 5-speed manual transmission, the gear ratio of which is designed to accommodate all applications from conventional use to heavy-duty transportation. The smooth gear shift is also a major plus.

2.8 Duramax Diesel

The 2.8-liter Duramax diesel engine with 4 cylinders and 16 valves delivers 180 horsepower (132 kilowatts) and 470 nm torque at 2,000 rpm. This high-performance, fuel-efficient engine employs the direct injection system, Variable Geometry Turbo and an intercooler to boost torque at low revolutions. A servo motor controlled by the ECM (engine control module) improves driving performance while also delivering noticeable improvement in fuel efficiency. In addition to the 5-speed manual transmission, the Duramax engine in the New Trailblazer is given a 6-speed Active Select automatic transmission. Power is delivered with great consistency and optimal fuel efficiency gained with an overdrive gear of two gear ratios. And now, with the Active Select system, driving is made even more enjoyable, which allows you to manipulate precise gear changes at will.

EXTERIOR

Stand out with style.

A perfect harmony of design and luxury makes Chevrolet Trailblazer an ideal choice for those who are looking for something different. Whatever lies ahead, you'll be more than ready.

Projector Headlights

The projector headlights provide better driving vision, but only comes in the LTZ and LTZ1 models. The lamp provides a farther and better view, without blinding other drivers. The adjustable switch (High and Low position) helps the driver to find a suitable setting.

LED rear lamp.

The LED rear lamp gives a safer way to let other drivers know when you have stopped [Only in LTZ and LTZ1 models]. The rear lamp last longer and even saves more energy. A third brake light provides more safety along with a light reflecting lamp that helps create better vision and driving dimensions from a far distance.

Electric adjustable side mirrors with LED turn signal lights.

A broader vision is a greater envision. The large electric ajustable side mirrors come complete with LED turn signal lights. Beauty is in every angle.

Fog headlamp.

Enhance your vision, and increase your safety while driving in a rainy or foggy situation.

INTERIOR

An elite design for an elite driving experience.

Makes every ride a pleasurable journey with all the accessories you need along with spacious and luxurious cabin room. Display a different side of Chevrolet Trailblazer.

Multi-function steering wheel with cruise control.

Everything needed for an enjoyable ride is just one click away. An audio control system, phone call button via bluetooth and cruise control are all located on the steering wheel. Power seating controls (only in LTZ and LTZ1 models) make every movement adjustable with your fingertip.

Multimedia DVD player with 3D-navigation system on 7 inch display screen.

Don't worry about stopping for entertainment along the way with a supportable CD/ MP3/ MP4/ WMA and SD CARD. All trips will be more enjoyable and the touch screen display will help you drive with more confidence.

The 4WD mode, can electronically

change from 2WD to 4WD Hi and 4WD Lo. The controls are laid out in a perfect location that makes them easy to use.

Automatic air conditioning system plus a separate air conditioner for backseat passengers.

Get the perfect atmosphere at your fingertips and keep it consistent for backseat passengers in the 2nd and 3rd row with a separate air conditioner.

The next step of advancement with a luxury interior design also comes roomy and accommodating.

With 5 plus and additional 2 adjustable patterned seats, all your needs can be met with the 2nd and 3rd row able to fold down to create more loading room.

SAFETY

Safety is always a priority to guard against challenges ahead

A high-strength safety body structure and a large chassis offer excellent protection, every trip, every day.

Active Safety

The highly durable body frame of Chevrolet Trailblazer is capable of withstanding even harsh bending force. With the extra support beams inside of the door panels, impact force from a collision from the side is optimally absorbed, making the passenger cabin a safety zone. The chassis itself has been totally redesigned with special 'eight cross members' and a precise structural calculation to ensure optimum resistance against bending force. As a result, stability and traction operate at maximum both when the vehicle is empty and fully loaded.

Passive Safety

Double SRS airbags and safety belts with pretesioner and load limit Large, highly resistant chassis with cross members Monocoque (Trailblazer is not monocoque, as a product is body on frame, mentioning about side beam will be adequate) body frame structure with side beams to protect the passenger cabin from a collision from the side Collapsible safety steering wheel reduces the force of impact to the chest in the event of a frontal collision. Laminated windshield retains shattered bits of the glass which would otherwise be dispersed as shards, hence effectively minimizing injury.

Suspension

Comfort and traction is optimized with the use of independent double wishbone suspension on the front and half-oval steel leaf springs on the rear, plus gas shock absorbers (front& rear is preferable) (Translator's note: front, rear or both?). Driving confidence is thus assured for all speeds, on a straight road, on a curve, while empty and while loaded. This excellent setup works wonders in superbly supporting the vehicle in virtually all conditions

Safety monocoque body frame

BRAKING SYSTEM

Total peace of mind is there... every time you step on the brake pedal

Trailblazer with its advanced four-wheel disc brake system gives you the desirable and class-leading sense of superior security

- **ABS (Anti-Lock Braking System)**
  prevents the wheels from being locked in emergency braking.
- **EBD (Electronic Brake Force Distribution)**
  ensures optimal distribution of braking force.
- **TCS (Traction Control System)**
  saves the wheels from spinning freely.
- **ESC (Electronic Stability Control)**
  improves stability as the vehicle cruises forward
- **PBA (Panic Brake Assist)**
  effectively handles challenging sudden braking.
- **CBC (Cornering Brake Control)**
  increases stability when brake is applied while cornering.
- **HBA (Hydraulic Brake Assist)**
  increases brake fluid pressure when needed.
- **HBFA (Hydraulic Brake Fade Assist)**
  works to ensure the ideal brake fluid pressure.

HDC (HILL DESCENT CONTROL)

As the vehicle proceeds down a steep slope, simply activate the HDC and the system will have the engine and the brake working in unison automatically in order to limit the speed of the vehicle to the most appropriate level, thereby making the descent much safer.

HSA (HILL START ASSIST)

The HSA prevents the car from rolling away when trying to pull away on an up or down gradient by acting to hold the car stationary after the brake is released giving a driver more safely.
